

About ISO 9001 QMS

ISO 9001 is an latest internationally recognized standard for Quality Management Systems (QMS).

It provides a framework and principles for your company to ensure that the common sense approach to running your business in a consistent manner to achieve customer satisfaction.

ISO 9001 is suitable for any organization that wants to improve its operation and is managed, regardless of size or sector. However, the best returns come from companies who are ready to take it throughout the organization rather than individual sites, departments or regions.

The ISO 9001 Standard follows eight quality management principles:

- Customer focus
- Leadership
- Involvement of people
- Process Approach
- System approach to management
- Continual improvement
- Factual approach to decision making
- Mutually beneficial supplier relationships
